## WONDERLAND NURSERIES

ELLERSON, VIRGINIA

4 miles from Richmond, Va. on C. & O. Rwy.

Phone: Mechanicsville 2721

The NEW  
IMPROVED  
**BARKER**  
WEEDER  
MULCHER  
CULTIVATOR

No. 6—The Baby BARKER Jr. Especially adapted for greenhouses, where the rows are close together; small gardens. Lower knife works strip six inches wide. Has 7¼-inch wheel heads, eight rotary blades. Three shovels and leafguards. Price **\$6.25**

No. 8½—The BARKER, Jr. A favorite where onions are grown extensively, and for the family garden. Women and boys and girls like this size. Works a strip 8½ inches wide. Has 7¼-inch diameter wheel heads, 8 rotary blades. Three shovels and leafguards. Price **\$6.95**

No. 10—The Barker, Jr. Ten. A very popular size. Works a strip ten inches wide. Has 7¼-inch diameter wheel heads, 8 rotary blades. Three shovels, and leafguards. Price **\$7.45**

## "The Best Weed Killer Ever Used"

Thousands of garden raisers throughout the world have told us how easy it is to tend garden with the BARKER. Other manufacturers have tried to imitate its fine points. Not a single purchaser has ever returned a BARKER, complaining that he was not satisfied with its work.

Now, we have perfected improvements that make the BARKER even a finer and easier operating machine than ever before. New, patented FILLER DRUM construction makes the NEW BARKER much easier to run . . . an even more effective weed killer! The purpose of the FILLER DRUM construction is to cause the BARKER to keep on the surface of any kind of soil—sand, muck, or mellow earth; and prevents it from digging in or stalling. All soils are mulched at same depth; keeps clods, stones, sticks and trash out of the reel—makes a wonderful difference in its work. For deeper mulch adjust the underground knife.

For nearly 30 years the BARKER has been the favorite hand garden tool with garden growers everywhere! It is a tested and time proven success. There are thousands of enthusiastic, satisfied users in every state as well as more than thirty foreign countries. The BARKER is the one machine which completely fills the big need of every garden grower . . . the need of a quick, EASY and thorough way to weed and mulch.

## THREE MACHINES IN ONE

The BARKER is really three machines in one . . . a weeder, a mulcher, and a cultivator! The reel blades, set in revolving reel heads, rotate against a stationary knife. This knife, which is placed immediately behind the revolving blades, travels just below the surface of the ground, and cuts the weeds at their roots.

Working in combination with the stationary knife, the moving blades destroy the weeds, pulverize the clods, allow the air to filter through the fine soil, and form a perfect soil mulch. Between the blades and the knife is a narrow space which causes the surface crust to be granulated and filter down to a level, moisture-retaining soil mulch.

# To Our Patrons!

---

Once again we offer you our catalog of CHRYSANTHEMUMS. We want you to know that this catalog is backed up by over thirty-five acres of the finest field plants we have ever grown.

We are prepared to handle your orders large or small.

Prices are F.O.B. Ellerson. We will furnish 25 at 100 rates, 250 at 1000 rates. Example: @ \$3.00 per 100, \$.75 for 25.

IF LESS THAN 25 OF A VARIETY ARE WANTED, add 5c per plant for additional handling.

We are located 4 miles North East of Richmond, on the C. & O. Rwy. Several trains daily. Our phone number is MECHANICSVILLE 2721. You may phone us long distance at any time, day or nite, or Sundays. The person answering the phone will be able to take your order.

Our terms are cash with order. If wanted C.O.D., do not forget to enclose one-fourth payment with order.

Telegrams are delivered to us from Richmond by telephone.

Mail is delivered several times daily. Use Air Mail if in a hurry. Special Delivery is useless here, as we meet all mail trains. Rush orders usually go out on next train if stock is ready.

We owe all our success to you. Thank you very much.

Sincerely,

Wonderland Nurseries

## SEEDLING CHRYSANTHEMUMS

From The University of Illinois Agricultural Experiment Station

PROF. H. B. DORNER

---

ILLINI AUTUMN—Pompon. Flowers nepal red fading to Japan rose;  $1\frac{3}{4}$  inches, of good depth; cutting date November 12; good producer.

ILLINI BEAUTY—Pompon. Flowers lemon chrome with bronze center; fading to uniform lemon chrome;  $1\frac{1}{2}$  inches; cutting date November 25. Rather tall grower.

ILLINI CANARY—Pompon similar to Varsity. Flowers pale yellow; 1 to  $1\frac{1}{4}$  inch; cutting date November 5. It flowers evenly so that crop can be cut clean.

ILLINI EAGLE—Anemone. Flowers English red with gold-tipped center, changing to uniform light orange-yellow;  $2\frac{1}{2}$  inches; cutting date November 20. Good grower with heavy stems.

ILLINI FAIRY—Button pompon. Flowers amaranth-pink changing to mallow pink; 1 inch; cutting date November 16. Growth good, short necked with sprays level across the top. A good deep pink button.

ILLINI GLORY—Single, similar to Mensa, with 6 to 8 rows of ray florets. Flowers pure white with yellow disc; 3 to  $3\frac{1}{2}$  inches; cutting date November 5. A strong grower and more productive than Mensa.

ILLINI GLOW—Large pompon. Flowers lemon-chrome; 2 inches; cutting date November 14. Stems strong and sturdy with well placed flowers on short, firm pedicels.

ILLINI GOLD—Large pompon. Flowers bright cadmium yellow similar to that of Friendly Rival;  $1\frac{3}{4}$  inches; cutting date November 16. A plant of medium height and sturdy growth. The deepest yellow pompon in the University collection.

ILLINI PRINCESS—Pompon. Flowers ochraceous-orange changing to uniform ochraceous-buff when mature;  $1\frac{1}{2}$  to 2 inches and about half as high; cutting date November 12.

ILLINI SNOWFLAKE—Pompon. Flowers pure white;  $1\frac{3}{4}$  inches; cutting date November 14. A good grower with sturdy stems and short necks. A purer white than Bobby and a better grower.

---

---

Prices—all Illini varieties—\$3.00 per 100, \$27.50 per 1000

# Books for Florists

Experience is a good teacher, but a slow one. Help yourself by studying informative books on trade subjects. Here are some of the best books for commercial florists.

<b>THE GARDEN IN COLOR</b> , by Louise Beebe Wilder. This, the last book by America's favorite garden writer, combines one of her most readable texts with 320 reproductions of natural color photographs—gardens, flowers, flower beds, and arrangements at every season of the year, and Mrs. Wilder's text gives hints on culture, arrangement, etc. <b>GARDEN DIGEST</b> says, "a priceless companion to every catalogue and garden book. 7 $\frac{7}{8}$ x10 $\frac{3}{4}$ inches. ## L333

A Rotenone Spray that definitely controls Red Spiders, Thrips, Green Fly, White Fly Larvae and Aphids on All miscellaneous crops. Use L333 on Any type of Open Blooms with absolutely No injury.

MR. GROWER: If you are not already a user of the below mentioned *Plant Sprays*, this communication will serve to introduce them to you:

**Safe to Use**  
**Economical**  
**Effective**

## Rose Special

Sure death to Red Spiders and Thrips on Roses! Is an Ovicide! Kills high percentage of Eggs! No Burning — No Hardening of Plants — No Stunting of Growth—No Residue. Contains no excessive oils.

*Read what growers throughout the country have written to us in response to our inquiry regarding results obtained.*

### ILLINOIS

**W. J. BUSSERT, Secretary A. F. AMLING CO., Maywood:** "We wish to compliment you on the performance of both these materials. L333 we have used extensively on mums this year. We have not had any burn with either or these insecticides and evidently it kills the insects because our plants are clean as a whistle. We trust you will not change your formula, so that we may expect the same good results in the future that we have had in the past."

**FRITZ BAHR GREENHOUSES, Highland Park:** "We have found L333 very effective, safe and economical to use."

**WM. G. LOVERIDGE, Secretary ILLINOIS STATE FLORISTS' ASSOCIATION, Peoria:** "Pertaining to the L333 Plant Spray that we are now using. I can say at this time that we are getting good results."

**McFARLAND'S GREENHOUSES (W. E. Keithley, Grower), Naperville:** "Our chief trouble was with red spider, of which we had a very heavy infestation, some thrips and aphids. Upon regular application of your spray at intervals of two or three days and at a concentration of 1-400, we were very well satisfied with the results. We like L333 for its killing power and, secondarily, for the ease with which we can clean our machine of any remaining spray."

*We Have Tried*

# HYPONEX

*In Our Own Nurseries.*

*Now We Wouldn't Be  
Without It*

There are many plant foods on the market but there is nothing like Hyponex. After trying nearly everything else, we are convinced that Hyponex is the best, simplest and most resultful of all plant foods—as well as the most economical.

With Hyponex, you may grow plants in sand, cinders or barren earth. It builds better root systems, stronger and larger plants, more and bigger flowers, fruits and vegetables. In addition to other perfectly balanced ingredients, it contains the amazing B-1 Vitamin.

Used with the ordinary water system, hose and a Fertil-Spray (an exceptionally clever device for spraying Hyponex-and-water) the application of this plant food is as simple as watering.

We urge you to use Hyponex yourself and sell it to your customers. A 1-lb. can will make a steady user in nearly every instance. Hyponex thus gives you chance for a double profit—one from its use and one from sales.

# **PUTTITAPE**

THE MODERN GLAZING PUTTY

***Just Unroll It and Press It On!***

The Job Is Done and Done Permanently

**Ever Soft Putty on Everlasting Lead Tape**

**PERMANENT . . .** Once you cover your greenhouse with Puttitaape you can forget about all future glazing and puttying.

**EASILY APPLIED . . .** Anybody can put on Puttitaape. Simply unroll it and press it in place and the job is done. Even a child can do it.

**ENDS PAINTING . . .** When you put on Puttitaape you cover your house with lead. This metal covering never needs any care or paint.

**SAVES UPKEEP . . .** The lead cover shuts out weather and stops dirt and water from running in over your inside frame work, thus saving it and eliminating much inside painting and repair costs.

**LOWEST COST . . .** Can be applied on all houses without your having to paint first as you must do with all liquid putty put on with putty gun. Saving of labor and paint on this almost pays for the Puttitaape, and you don't need to reglaze or putty every 3 or 4 years.

**\$3.00 Per 100 Feet \$30.00 Per 1,000 Feet.**

—Completely Covers the Roof Bar—

# **MUMSHADE**

- (1) MUMSHADE is 100% lightproof.
- (2) MUMSHADE is a solid sheet of thin, tough vulcanized rubber reinforced with a good grade of cotton fabric in the center and the finished product will wear well and permit satisfactory use for several seasons.
- (3) MUMSHADE is light in weight for a coated fabric, making it easy to handle.
- (4) Most coated fabrics offered for shading have a tendency to pin-hole, crack and peel. MUMSHADE has been developed to the point where these major defects have been entirely overcome. No report of fault has reached us during the past two years.
- (5) The price is right! MUMSHADE is competitive in price with the ordinary, uncoated shading material.

**Professor Alex Laurie, of Ohio State, says:**

"Our tests of MUMSHADE this year have been very satisfactory. We found no cracking or pin-holing and as a consequence it should be better than the material you had made previously."

**Professor Kenneth Post, of Cornell University, says:**

"MUMSHADE proved very satisfactory and I am most enthusiastic about it. During the one year of testing, it hasn't cracked or peeled and appears to be in good condition for a second year. It is, of course, absolutely lightproof and I believe of lighter weight than of previous years. This certainly is an advantage."

# AMELIA

## HARDY CUSHION MUMS

This dwarf species is well suited for pot culture, but especially for landscape work. If planted early, the individual plants will often attain a size of three to four feet in diameter. The three requirements of success are: Rich soil, Full sunlight, AND PLENTY OF ROOM. Four to five feet apart in field rows.

While they are in flower normally in August, some will start blooming in June. The short sprays can be used by some to great advantage in FLORAL work. Late plantings WILL result in later blooms. While the usual height is about 18 inches, rich soil or a slight shade will increase the stem. Extensive pinching is required for pot culture. Indoor handling will result usually in faded blooms unless care is taken to expose them to full sun.

For the home garden use they are unexcelled. They are so easy to grow your customers will usually have good results, and will be well pleased.

Five Wonderful Colors:

PINK — RED — WHITE — BRONZE — YELLOW

WE SUGGEST

you prepare now to furnish these plants to your trade.
